In Memoriam

Nous avons le regret de vous annoncer le décès de notre ami le pharmacien Laurent Klybik. Laurent était membre de la Société Royale Belge d'Homéopathie et a été actif à l'Ecole et dans les séminaires. Originaire du Belarus, il a été fort sensibilisé par la catastrophe de Tchernobyl qui a laissé tant de séquelles parmi ses compatriotes. Ayant recueilli l'air pollué de la région, il a créé le remède « Rack » pour le traitement des victimes des radiations ionisantes, mais dont l'action s'étend également aux suites d'exposition à d'autres rayonnements comme le téléphone portable ou les câbles de Haute Tension. Adieu Laurent, nous garderons toujours le souvenir de ta bonne humeur et de ton sourire avenant !

La rédaction,

Tela araneae

Dr Filip Degroote
Brugge - België

Biologisch:

Tela aranea is het spinnenweb.

De spindraad wordt gevormd door de spinklieren die op het achterlijf van de spin zitten. De spinstof is een snelstremmend eiwit, keratine, dat via honderden fijne buisjes van de spintepels naar buiten vloeit. Het spinapparaat bestaat meestal uit drie paar spintepels. Elk paar heeft zijn specifieke functie en is verbonden met de spinklieren.

Homeopathisch:

De homeopathische verdunning is gemaakt van het verse trechtervormige web van de huisspin (*Tegenaria domestica* of *atricia*).

Symptomen, volgens de signatuur*:
Dreams of nylon, nylon panties, an extremely strong rope, network of ropes, a funnel, net, trap.

nb: Spindraad is enorm sterk en heeft al zijn eigenschappen nog niet volledig prijsgegeven. Zo zou een spindraad met de doormeter van een potlood een op volle snelheid vliegende Boeing 747 kunnen doen stoppen.

A2517GD *Tegenaria domestica*

Casus 1:

Een 64-jarige vrouw heeft sinds enkele weken last van een droge prikkelhoest.

Onlangs had ze zelfs een lichte gastro-enteritis met overgeven. Hoewel ze uren na de maaltijd overgaf was het overgeefsel onverteerd. Verder heeft ze nog nooit last gehad van aften maar nu heeft ze één op de achterzijrand van de tong.

Ze heeft volgende dromen genoteed:

- droom a: Ze is in een huis samen met haar kleinkind. Hoewel haar kleinkind een baby is van amper vier maand oud kruipt hij al overal op (1). Zo moet ze hem telkens snel grijpen wanneer ze ziet dat hij bijna uit de zetel valt. Wat later, na hem te hebben ververst, klimt hij (2) op de werktafel en opnieuw grijpt ze naar hem omdat ze bang is dat hij zal vallen (3).

Het gebruik van dromen in de Homœopathie:
Tela araneae
Dr Filip Degroote

Een tijd later komt er in de straat een jongetje voorbij op een heel klein karretje met een kleine motor erop. Hij sleept achter het karretje een paar grote stenen met zich mee. Op een van die stenen ligt een baby die er bijna afvalt. Op het eerste zicht denkt ze dat het haar kleinkind is, maar als ze er naartoe loopt ziet ze dat het een andere baby is. Ze neemt de baby op en legt hem in het karretje zodat hij naar huis kan gevoerd worden (4).

- droom b: Ze is samen met anderen in een restaurant met zelfbediening. Ze moet nog iets betalen, wellicht alleen een fles water, en geeft 20 euro. De dame aan de kassa rekent af en geeft haar niets terug. Wanneer ze uitleg vraagt zegt de kassierster dat ze ook nog Malborou's moest betalen. Ze weet eerst niet wat de dame bedoelt. Dan blijkt het dat over het sigaretten gaat. Ze weet zeker dat ze deze niet heeft besteld daar niemand van haar gezelschap rookt maar ze vindt bij de dame geen gehoor. Ze denkt bij zichzelf: 'Dan drink ik nog maar een kop koffie, dan heb ik toch iets voor mijn geld'. Maar ze kan het koffieapparaat niet bedienen en vraagt de zoon van de zaak om hulp. Die zegt haar dat ze een tas moet nemen maar er zijn geen tassen meer. Dan neemt ze een metalen kannetje en zet het onder het kraantje. Ze duwt op de knop en er komt enkel warm water uit. De klanten in de zaak zijn allemaal Engelstalig en daar ze geen Engels spreekt weet ze niet wat doen. Plots stapt er iemand van hen naar haar toe en zegt haar in het Nederlands: 'Het is altijd zo dat ze je ergens bedriegen'. Dan wordt ze wakker.

- droom c: Het is nacht en we liggen te slapen in onze vroegere woning. Ze staat op om te urineren. Ze wil het licht aansteken maar doet het niet omdat er lichtinval genoeg is. Plots ziet ze door het raam aan de andere kant van de straat een auto staan met dimlichten aan met ernaast twee mannen in blauwe overal die in de graskant zitten. Ze doet de rolluiken dicht en bedenkt dat ze gelukkig het licht niet heeft aangestoken. Wat later gluurt ze nogmaals en ziet dat de auto en de twee personen er niet meer zijn. Ze wordt opgelucht wakker.

- droom d: Ze zijn op een feestje en er staan lange tafels in een zaaltje. Ze heeft wat geholpen om versnaperingen, o.a. koekjes en chocolaadjes, op tafel te zetten. Ondertussen heeft iedereen al soep gegeten en moet zij nog beginnen. Ze krijgt dus ook wat soep. Er liggen enkele versnaperingen op de bovenboord van haar bord en ze wil nog wat soep bij. Daarom houdt ze haar bord schuin om nog wat soep bij te vragen. De pot soep staat echter op de grond en er komt iemand er naar toe om soep te nemen. Hij neemt de pollepel en drinkt soep uit de pollepel. Door dat te zien is haar zin in soep over. Bovendien zijn haar versnaperingen op haar bord in haar soep gevallen zodat ze er geen zin meer in heeft. Dan schiet ze wakker.

Het gebruik van dromen in de Homœopathie:
Tela araneae
Dr Filip Degroote

Medicatie en follow-up:

Patiënte krijgt Tela MK gevolgd door Psor. LMM K.

Ik zie haar vijf maand later terug. Ze voelde zich de laatste maanden erg goed en heeft tijdens de winter geen echte klachten gehad. Nu is het zomer en ze heeft sinds enkel dagen een lichte hoofdverhoudheid met een prikkelhoest.

Haar dromen verwijzen nu naar mag-m. dat haar wordt voorgeschreven en haar terug in orde brengt.

Droomsymptomen:

- (1): Agility, great, of a baby
- (2): Climbing
- (3): Danger of falling
- (4): Drawing big things home

Bespreking:

a. In het eerste gedeelte van droom a staan er vele signatuur-elementen die verwijzen naar een spinnenremedie. Deze elementen zijn o.a. de grote behendigheid en het klimmen.

Het tweede deel van die droom refereert sterk naar wat een huisspin doet met haar prooi, namelijk ze sleept die naar haar trechter waar ze de tijd neemt om die te verorberen.

De huisspin weeft namelijk haar net meestal in een hoek van een kamer evenwijdig aan de grond als een soort vangnet voor vallende prooien. De prooi raakt meestal 'hogerop' verstrikt in de echte val die bestaat uit een wirwar van plakkerige bijna onzichtbare draden die de spin daar gespannen heeft. Dan pas valt de prooi naar beneden op het web en tracht er zich spartelend vrij te maken. Dit doet pas het net trillen waarop de huisspin reageert en vervolgens haar prooi binnenhaalt in haar trechter. De trechter zit meestal verborgen in een spleet of achter een meubel en is achteraan open zodat de spin bij gevaar langs daar kan ontsnappen.

b. Een ander belangrijk thema is het verwerven/bekomen van voedsel: cf. droom b en d.

Ook dit is een signatuursymptoom, want daarvoor dient nu juist een spinnenweb.

c. Het bedriegen in droom b verwijst eveneens naar een signatuur-element, namelijk de quasi onzichtbare draden van het hogerop gespannen net. Eens erin verstrikt is er geen weg meer terug.

Dit thema wordt ook vermeld in een droom afkomstige uit een recente prooving van tela aranea, die werd verricht door Sowton:

Dream I was in a restaurant having dinner with my friends. The waitress came to serve us. She distributed the food to all the other people, but when it came to my turn she put some leftovers on my plate. I felt it was so unfair.

Droom-symptomen, afkomstig uit deze prooving, zijn o.a.:

Dreams, restaurants, not being served properly in a

Dreams, restaurants, feeling excluded in a

Het thema in deze droom kan nog meer gespecificeerd worden als 'being treated unfair'.

Casus 2:

Een 43-jarige man met sinusitis-klachten heeft de volgende dromen:
(1): Er zit een kraai in een gammele kooi. De achterkant is gemaakt van karton. Bij het verplaatsen van de kooi ontsnapt de vogel. Hij kan de vogel gelukkig terug vangen want de vogel is wat tam en traag.
(2): Hij is bezig met touwklimmen. Dit is iets wat hij erg vlot en behendig doet. Wanneer hij voor de derde keer naar omhoog klimt bemerkt hij dat het touw waarop hij nu naar boven klimt bovenaan abrupt eindigt en nog enkel opgehangen is met een dertig centimeter lange 'dunne' draad. Toch panikeert hij niet wanneer hij dit ziet en komt hij beheerst en vlot naar beneden. Eens een meter boven de begane grond laat hij het touw los en landt hij veilig op de grond.
(3): Hij kijkt naar zichzelf in de spiegel en ziet zichzelf zoals vroeger met zwart haar. Plots zijn er overal waterdruppels op de spiegel waardoor het beeld vervaagt.
(4): Hij hoort inbrekers beneden. Hij laat uit veiligheidsredenen eerst alle leden van het gezin zich verzamelen in de badkamer. Daarna zal hij proberen iets te ondernemen.
(5): Hij ziet een soort watertoren in oude baksteen. Bovenaan is er een verbreding met een doorzichtig rooster met grote gaten. Hij maakt zich de bedenking dat hij niet graag aan de buitenrand van dit rooster zou willen staan.
(6): Hij bevindt zich in een onherbergzaam, woest en rotsig landschap. Er zijn hier en daar struiken met takken zonder bladeren. Deze takken zijn soepel en niet dor. Wanneer hij verder gaat zijn er meer en meer van die takken. Hij ziet er ook een man en een vrouw die voor hem uit stappen en die blijkbaar samen horen. Vervolgens komt hij aan een wegsplitsing. Links is er een weg die eerst steil bergop gaat. De rechter weg loopt rondom de berg heen. Plots bevindt hij zich in een soort oase. De vrouw schept water uit een bronnetje met een onbekend voorwerp. Daarna bevindt hij zich in een ovalen gebouw met een verticale opening. Door die spleet ziet hij aan de buitenzijde een vrouw staan. Ze zegt hem: Voor en achter ben ik OK, maar in profiel ben ik veel te dik. Eerst begrijpt hij niet goed wat ze zegt, zodat zij het herhaalt. Dan neemt hij haar vast en begint haar hartstochtelijk te kussen.

Bespreking:

Het is droom (2) die mij aan de remedie doet denken wegens zijn signatuur-inhoud, namelijk de dunne draad waaraan het touw is opgehangen dat enorm stevig blijkt te zijn.

Ook het thema van het klimmen (cf. casus 1) komt in deze droom terug.

Ook het energetisch onderzoek bevestigt deze keuze.

Het gebruik van dromen in de Homœopathie:
Tela araneae
Dr Filip Degroote

De toren met bovenaan een verbreding met rooster met grote gaten in droom (5) doet eveneens denken aan het hogerop gelegen web dat de huisspin vervaardigt (cf. bespreking casus 1).

Thema's:

1. Een erg dun en erg sterk touw (cf. nylon): droom 2.
2. Thema klimmen: droom 2.
3. Koppel-vorming: droom 6.
cf. Bij alle spinnenremedies vormt de seksualiteit een belangrijke compulsieve component.
4. Ovaalvormig bouwsel (cf. web/trechter): droom 5 en 6.

Energetisch onderzoek:

Zwakke spieren, rechts, zijn: psoas, peroneus longus & brevis en supraspinatus te testen met de duim naar omhoog gericht..
Het acupunctuurpunt Long 4, links, is eveneens uit balans.

Toevoegsel:

SOWTON's spiderweb proving:

Themes and Highlights of the Proving:

The most striking feature of the feeling landscape of Tela is a horrible depression described in the simple language of the provers as shit, gross, dark, heavy, paralysed, disconnected, confused, foggy, fringed, dragging. "Not a happy remedy" as one prover said "I hate feeling like this!" Several of the provers elected to antidote and the feeling state was made all the more clear as they came out of it and returned to themselves. The characteristics of this awful state are well described below and organized into themes. If you do not like the thematic organization or feel that it is not justified go straight to the Provers Journal Entries section.

A striking feature in the proving is a relative absence of fears. Tela is an unhappy remedy but, it seems, not a very fearful one.

Because so many provers did actually report feeling spacey, ungrounded, and disconnected, we decided to recommend it be entered in the new rubric Mind - spaced out feeling. However I feel all provers experienced some disconnection as they entered the proving state and are separated from their normal selves. The characteristic nature of the Tela disconnection is described below.

Getting Sick / Heat / Foggy

* Day before, carrying remedy in pocket.

Foggy. Unclear. "Fridged". Didn't take remedy because was sick.

Body is warmer than normal. Eyes dry, skin still dry. Dull headache behind eyes. Stiff on right side of neck. Head felt "weird", "spacey". Just happens when caught 'off guard'. (7)

* 2 minutes later (after taking remedy), feel warmth, starting to sweat: feet, axilla, head, but feet feel cold, and hands warm & sweaty. Anxious feeling - may catch something, (I recognize when I'm feeling like I'm coming down with something, but don't usually get anxious about it. (18)

* D. had several days where he seemed like he was getting a cold. He felt feverish on and off. During these times he would get depressive and fear that the remedy may have permanently changed him. (9)

* Feeling "gross", ie. sore neck / upper back, lightheaded, very sleepy, "sick". Attribute to the onset of an illness because of thesis stress, but never did get sick. Worse being idle, not concentrating, being mentally inactive. Better sleeping, lying down, being mentally active. (8)

* As if coming down with something, like a head cold. Tired, like I have the flu. (20)

* Editor's note: in addition to the very prominent about-to-get-sick sensations listed above, so many of the provers had some feelings, of heat, flushing, or feverishness; and so many had feelings of mental fogginess and inability to think properly, that I think it is very likely that Tela may prove to be a great remedy for the prevention of flus and common colds, especially "head colds". In order to make sure this gets into the repertory I have recommended the rubric: Nose-coryza-sensation of, with sub-rubrics: heat, with; anxiety, with; and mental fogginess, with.

Not Welcomed / Wanting to be Included / Teenager

* dream I'm chasing after a train with friends and loved ones on board. A feeling of being left behind. (1)

* dream I was an intruder in someone's house. I tried to make myself into a regular member of the household. I ran into several people and had some conversations-trying to "talk my way out of suspicion". Anxious feeling-trying to be somebody I wasn't. (7)

* someone said something about "Americans in the kitchen" (I'm American). I responded in an aggressively sarcastic way. I didn't like my altered state-bitterness disguised with sarcasm. I felt the need to tell the others that it's the proving, it's not me. (9)

* I was hostile, having dinner at a restaurant with some others. I angrily stated that I did not want to sit over there (at the end of the table), I wanted to sit more in the middle. After this I felt fear that I can't control the actions of the remedy-that I'll lose control to it. (9)

Het gebruik van dromen in de Homœopathie:
Tela araneae
Dr Filip Degroote

* dream I'm with M. (girlfriend) at her relative's place in the country. She wasn't spending much time with me, and she had a dream about her friend that she wasn't telling me about. We finished cleaning up after dinner, it was dark. I wanted to go to bed together but she didn't. I was scared, almost panicky, from seeing some shadows on a wall. She didn't seem to recognize or care; she told me simply to go to sleep on my own. I was afraid. (14)

* dream I had a dream about a bear who wasn't welcomed into the community. There was some kind of fun-day or sports-day on a big field with a tall wooden fence around it. People were worried about the bear and it was driven away. I saw it running away across a field. I felt sad that it had to be driven away. There was a feeling of isolation. (14)

* dream I was dating a young man who my parents thought was no good for me. They put a lot of pressure on me, even threatened to disown me, if I did not break up with him. I kept the relationship with him. When I came back home all my stuff in my bedroom was gone, the house had no space for me any more. (15)

* dream In a big house. The lights were hanging off the ceiling like small helicopters hanging on threads. They were flying in circles. One of them had a defect—it went out of control and collided with the other lights, so pieces of broken glass were all over the floor. Instead of sweeping the glass up off the wooden floor, my relatives swept it into my bedroom. Now the carpet in my bedroom was covered with bits of glass. I try to tell them that sometimes I practice yoga and walk barefoot on the carpet, but they won't listen and just keep on sweeping. I feel so angry and frustrated. (15)

* dream I was in a restaurant having dinner with my friends. The waitress came to serve us. She distributed the food to all the other people, but when it came to my turn she put some leftovers on my plate. I felt it was so unfair. (15)

* dream Our class is writing licensing exams after our graduation. I studied hard for these exams, and I'm looking forward to finding out how well I can do. When the examiner comes to me he grabs a magazine from the shelf, he asks me to read some articles and write what I think about them. I feel this is so unfair-how can he test my medical knowledge in this way? (15)

* dream I'm with my girlfriends at McDonalds. I meet a foreigner. There are feelings of jealousy, like we are competing for the attention of the opposite sex. I eat the food, and I'm very conscious about how much the others are eating. I'm being very judgmental about their body shape and weight. I feel the same insecurity I had when I was a teenager; wanting to be accepted. I feel like I'm reliving my teenage years. (15)

**Het gebruik van dromen in de Homœopathie:
Tela araneae
Dr Filip Degroote**

* dream Lunch break, some of my classmates from school were sitting outside around a picnic table under the sun, there are some empty seats. I carried my lunch and walked to them. "May I join you?" I smiled at them. One of them looked at me with a stern face, she put her hand on the empty seat next to her and said to me, "No, the seat is taken". I felt not fit in and was alienated by my peers, I was longing for acceptance and understanding. (15)

* Thoughts, journal entries made during the proving: ...the question is: how do you ever grow out of being a teen? What are the landmarks? A teen feels awkward-hormones coursing through my body. Trying to connect and belong to a group. I have only ever allowed myself to connect to the Macedonian group. Tears, tears, tears. Profound anguishing tears. I've never felt like I totally belonged anywhere. (20)

* dream I am part of a large cast for a theatre production. I say that I am not doing it to make money, just to enjoy the experience. Some of us(?) are told we can stay at a nearby hotel if we pay for it ourselves. So we stay, while buses with some others go off somewhere. We meet up with the group the next day. Someone has something for me to do-to make some kind of a braid for a horse, and glue it onto something. I am annoyed - I want to be in the acting, performing part. But I agree to do it. (20)

* dream I'm in some town. I stop at a restaurant. There's a long line-up for tables, about four women are waiting for single tables. I figure I'll have to wait forever for a table. I ask the hostess if I can be seated with someone. She says no, they want to be alone. I feel rejected, they don't want my company. (21)

* dream my girlfriend is angry with me. We are a couple; we are both white women. She's telling me if I don't like it I can move out. (21)

* dream I'm at a grocery store(?) with four other women. Were going to eat here. We traveled up a super-thin elevator to get here. We order some food and sit down. They get the food and bring it to the table for G. and me. I eat my Caesar salad before realizing we were supposed to share. I ask if they want me to get another one for them-they say no, but give each other looks like I'm so selfish. J. is talking about her new job, and U. is giving her some advice. She's going to be teaching at a private girl's school. I'm so envious. I feel out of the group, like I'm the fucked-up one. (21)

* At study group. Normally a light sense of being different, or not belonging. Something different, I felt more like I belonged there. Felt more accepted. (20)

*Het gebruik van dromen in de Homœopathie:
Tela araneae
Dr Filip Degroote*

Humble Dwellings / Desperate Living Conditions / End of the World

* dream a family is lost on a desert island. It's not my family, I'm not really in the dream, it's like I'm watching it on T.V. A bit like Swiss Family Robinson. (7)

* dream I'm lost and abandoned in a big city, looking for something. Confused, but not worried. (7)

* dream A bunch of people had to run away from society and live in the woods. Their mission was to hike around a huge lake and make sure nobody was hiding out. They were going to travel from cabin to cabin, circling around the lake, so as not to use up the resources. Everyone lived together and we had rations of supplies and food. I was in charge of fire and candles-very stressful, a lot of responsibility. I felt like I could handle the responsibility. I felt like I was a mediator trying to keep peace because people were fighting and angry. I was holding a candle and running around to help people. I was tripping and starting small fires by mistake. Then using blankets and other stuff to put them out easily. The dream was a little scary. It was a dark existence, an end-of-the-world feeling, sad and scary. (13)

* dream (this is the dream of a supervisor, who did not take the remedy. She was working closely with prover#13, and had this dream right after discussing and recording her prover's symptoms): the left side of my face is red, inflamed, swollen, like a cellulitis. The right side of my face seems like it's pulled downward, with a drooping lower eyelid. The eye is red and watery. My left breast has a bad mastitis, large, red, inflamed. The right breast is normal. I feel shocked about the face and breast, I'm trying to figure out how to make it better. Then I see a sick dog-a yellow lab, very young and skinny. The dog is on the side of the road near Grampie's field, near the swamp. I decide to breastfeed the dog. I'm looking around, trying to find a place for shelter. I think I was also supposed to be looking after children, they were around me or following me. There was a nuclear war kind of feeling, like trying to re-build after terrible things had happened to the earth. (13-S)

* dream later I had two or three more dreams about the end of the world. (13)

* dream Some friends and I burned a big pile of garbage to get heat. We ride on shiny boxes and a skateboard down into a big pit. We camp there. (15)

* dream of white houses on the side of the street, with missing doors and windows, but people still live there. (15)

* dream I killed someone, but I can't remember how or why. I went to see something with the family members of a friend of mine. On the way there we pass a dirty looking man growing and selling baby cedar trees in a hut by the side of the road. When we walk into the apartment we realize we are in trouble. We are chased and attacked by a group of people. There is a lot of killing happening around me, I try to hide but I am discovered and captured. Somehow I get out of the apartment, I see piles of bodies in front of it. I feel heartbroken that I will have to tell the news to my friend that her whole family has been murdered. (15)

* Editor's note; this end of the world feeling tone is very reminiscent of the post apocalyptic world in Russell Hoban's amazing novel Riddley Walker. As the nomadic characters slog around in the dark, heavy, muddy landscape, they could be in the dream of a Tela prover.

Biting / Stabbing

* I had an impulse, on seeing a knife in the kitchen, to stab repeatedly. I just slid the knife into the sink without picking it up. I thought "I'm not going to take it anymore", meaning the remedy. (9)

* Impulse to bite my own arm. Later I gnaw on the web of my hand. Later I bite my finger lightly-I find this soothing. Later I bit my tongue accidentally (9)

* (supervisor's observation of prover 9): D. periodically makes biting gestures which are quite dramatic.

* (four days after stopping the proving by antidoting) I notice that I still will occasionally bite my thumb or finger, but not nearly to the same extent or quality as when I was taking the remedy. (9)

* Fear of being bitten on the foot by something under the bed when my foot touched an object. (9)

* dream a dream vampires first about vampires and humans. We are trying to kill the vampires first (before they get us) with a stake. A van picked us up: four vampires and four people acting like vampires. A vampire inquired about how we are so lightweight and asked us how we are able to walk on small branches. I kept silent, fear I would be discovered and harmed. (9)

* dream I am visiting with my grandmother in China. Some of my distant relatives have committed a serious crime, they are wanted by the police. I hear them coming upstairs, so I lock the doors and try to call the police. The police ask me where the apartment is located but I don't know the street name. Now I will have to fight for both my grandma and myself. There are two of them, they are going to kill us. While one of them is looking out the window I knock the other one out. Then I pick up a pair of scissors and stab the first one. After some struggle I kill one of them and severely wound the other. The wounded one ran away. I was surprised that my martial art was good enough to fight them off. (15)

Het gebruik van dromen in de Homœopathie:

Tela araneae

Dr Filip Degroote

* dream A crazy mad goat was running around and bit me in the butt. I'm worried that I might get the mad cow disease, so I hurry off to get an immunization shot. (15)

* dream I was sharpening knives. Then I was carrying a big man, very heavy (15)

* a sharp piercing pin-prick pain in the right breast, about 2 inches medial to the nipple, it comes and goes about every 4 seconds. The same thing happened the next day (20)

* dream I'm walking past the back of an apartment building at night. There's a pack of huge dogs, tan and black, they come running at me. One of the black ones is particularly vicious and bites at my shawl. I am terrified' I'm sure I'm going to get mauled. Then all the owners come out and fetch their beasts. (21)

Restaurants

* dream of gorging in an Italian restaurant (on pasta, etc.) I couldn't get enough (1)

* I was hostile, having dinner at a restaurant with some others. I angrily stated that I did not want to sit over there (at the end of the table), I wanted to sit more in the middle. After this I felt fear that I can't control the actions of the remedy-that I'll lose control to it. (9)

* dream I'm in a restaurant. I'm new to this area. There is a man bossing people around, he sets a fire on the roof. The customers in the restaurant become really scared, but there's nothing they can do to stop him. He calls in government construction trucks to tear down people's houses and the restaurant, simply because he doesn't like them. An elderly woman lived in one of the houses which was being destroyed, she was desperate. The bad man was watching and laughing at us, satisfied that he had created so much anxiety and panic. I decided to take justice into my own hands. I caught him, I used a hammer to hit his head, I hit him hard, many times. I didn't kill him. I wanted to, but I couldn't. He ran away and left the area. (15)

* dream I was in a restaurant having dinner with my friends. The waitress came to serve us. She distributed the food to all the other people, but when it came to my turn she put some leftovers on my plate. I felt it was so unfair. (15)

* dream I'm with my girlfriends at McDonalds. I meet a foreigner. There are feelings of jealousy, like we are competing for the attention of the opposite sex. I eat the food, and I'm very conscious about how much the others are eating. I'm being very judgmental about their body shape and weight. I feel the same insecurity I had when I was a teenager; wanting to be accepted. I feel like I'm reliving my teenage years. (15)

* dream I'm in some town. I stop at a restaurant. There's a long line-up for table; about four women are waiting for single tables. I figure I'll have to wait forever for a table. I ask the hostess if I can be seated with someone; she says no, they want to be alone. I feel rejected; they don't want my company. (21)

Unable to communicate

* people think I'm not listening (1)

* When people talked to her she felt she was only half listening; out of it. (5)

* Foggy all day - never felt so bad about last 2 exams than ever felt in last two years- brain not functioning correctly. Still in anxious state off and on. Didn't feel connected, felt blocked-couldn't absorb information - "just fog there"- talking too much- annoying (7)

* I felt like I was in a bubble, separate from everyone else in the class. There was a sound in the bubble like a seashell on both my ears. It was a peaceful feeling. Sounds seemed far away, as if filtered through a seashell. I felt like "a watcher", and I felt insightful. This feeling came after every dose of the remedy, and lasted 30-60 minutes. (13)

* My mother is angry with me because she said I did not tell her I wasn't coming home last night, so she was really worried about me. I tried to call, but nobody answered the phone, I must have let it ring twenty times. Something is wrong with my communication, it's never happened like this before. (15)

* I had a lot of trouble and miscommunication with a doctor that I wanted to preceptor with, but I wasn't really bothered by it. (15)

* All my thoughts and communications were negative, I focused on the negative things, complained and complained. (15)

* I'm having difficulty with verbal communication, I'm glad I'm not working today. I'm better with non-verbals. I feel like an "empath" (on Star Trek). I can sense other people's discomfort, embarrassment, etc, but I have difficulty processing it. I don't know what to do with it. I feel clairsentient, I can feel everyone else's emotions, but I have no idea how to communicate verbally. Everything that comes out of my mouth is wrong. I also feel conflicted-of two minds about everything I might say. And very slow mentally. It's horrible! I'm so glad I don't really have to talk today. My desire is just to withdraw. (21)

* I felt like if the proving got any worse I wouldn't be able to see people at all. I would have to stay in, unplug the phone and weather it. (21)

*Het gebruik van dromen in de Homœopathie:
Tela araneae
Dr Filip Degroote*

Circling around / Capturing / Trap

* dream a member of a drug-busting team is in a plane (she's a pilot) chasing a drug dealer all around. When she catches him she puts the drugs in his drink and kills him. While she's chasing him she feels angry the whole time, but after she kills him she feels better. (3)

* on closing my eyes I saw a green sphere, with something like a spider web inside it. A kind of brightness was circulating like a chakra sphere, then I saw squiggly, wavy lines and I thought of spiders. (9)

* dream a bunch of people had to run away from society and live in the woods. Their mission was to hike around a huge lake and make sure nobody was hiding out. They were going to travel from cabin to cabin, circling around the lake, so as not to use up resources. (13)

* dream There is an insect trap in the corner of a house, made of cardboard. I saw some bugs going in, all kinds. The box got so full I had to dispose of it. I was told to dump the contents into a plastic bag and pour in some hot water. I wasn't sure how that would work. It didn't work. I thought of a glass container, then I thought of just throwing out the box far away from the house and getting a new trap. I'm not sure what I ended up doing. (14)

* I'm feeling a little lost in time, like time doesn't really matter. I was picking up lots of external stimuli, like the radio. I was very captured by the music at times. (14)

* dream I killed someone, but I can't remember how or why. I went to see something with the family members of a friend of mine. On the way there we pass a dirty looking man growing and selling baby cedar trees in a hut by the side of the road. When we walk into the apartment we realize we are in trouble. We are chased and attacked by a group of people. There is a lot of killing happening around me, I try to hide but I am discovered and captured. Somehow I get out of the apartment, I see piles of bodies in front of it. I feel heartbroken that I will have to tell the news to my friend that her whole family has been murdered. (15)

* dream a monster captured 13,000 people and kept them in a circle. He would pull out one person at a time and slowly tortured and killed her / him. Everyone watched in fear but could not do anything about it. I was in the crowd too and was very nervous when the monster passed by me. The monster liked one of my girlfriends who was very pretty and young. We plan to lure the monster in the trap and kill him. We were watching the monster making love with my girlfriend outside on the grass. My other friends tried to hide knives under the sand. I watched out for them. I was so nervous, I told my friends to hurry up. The monster fell asleep, we sneaked in and used knives to cut him. Suddenly the monster disappeared, only his clothes left on the bed.

I have a strong sense the monster has got into one of my friend's body. Suddenly, I cannot trust any of my friends because they could be the monster and start to attack me. I was so scared, felt no sense of security what so ever. (15)

* during and since the proving my sex drive has been very high. I can't keep my eyes off the cute guys. (I know it's not my regular self; I couldn't help but laugh at myself). I feel like I have a strong sexual energy circling around me, it pulls several men into my life, but none of them is really right so I reject them. (15)

* image of about 18 white chips, mosaic tiles, coming into my visual field, then coming together into a circle shape, scattered through the circle area (20)

Disconnection of Upper and Lower / Awkward

* Dizzy after exercise; not vertigo-more like being disconnected (1)

* I stepped on people's toes twice. When I told someone this they asked: "are you drunk?" Later I thought: could this be a remedy for drunkenness?; because I feel disinhibited, discoordinated, high, poor concentration, and aggression (9)

* I felt like my top and bottom half were separated. I tripped and bumped my knee so many times. It was like my brain only controlled as far as my waist. I felt very lax in the lower body. My legs would fall open when sitting-like a rag doll. It was almost like I forgot I had legs. (13)

* (Supervisor's observation of prover 15): She was wired, buzzing around like a chicken with its head cut off, like she'd just had three cups of espresso. Her feet weren't hitting the ground. Very flustered, usually she's very together.

* I cannot connect with my legs to move them in the direction I want. (20)

* Feel pretty depressed, lonely, cold, disconnected. Wish I could run away / escape from school and the work involved. (14)

Sagging / Collapsing / Heavy

* (Supervisor's observation of prover 9): I saw D. on Friday afternoon. My impression was that he was depressed. His face seemed to be sagging.

* (from the supervisor's summary of the proving, for prover 9): While D. was doing the proving he changed. His personality was profoundly affected, and it carried into his gait and his facial expression. He was dragging in his face and heavy in his walking.

* I really felt my third eye "heaviness" tonight while meditating. I think I need to release some blockage before I will be able to really see. (14)

Het gebruik van dromen in de Homœopathie:

Tela araneae

Dr Filip Degroote

- * dream I am in my living room and I see that my ceiling is sagging. It must have too heavy a load above. I try to see if I can push it up. It is not soft, like from water. It isn't giving any. (20)
- * soon after taking the dose-a sense of heaviness, numbness, sluggishness in the arms (<R) and jaw, like psilocybin. A feeling of darkness and heaviness-not a happy remedy. After the next dose the same feeling: heaviness, almost paralysis. I had paralysis-like imagery. (21)
- * My eyes felt heavy, like a great emotional fatigue. A feeling of being exhausted by the onslaught of energies I was taking in; I couldn't keep them out of my body. (21)
- * Eyes, heavy like a great emotional fatigue.
- * Right ear, neck, shoulder, abdomen & hip, heaviness, almost paralysis. (21)
- * Severe depression. (1)
- * Despondent, hopeless cloud of despair, lasted about a week. (1)

Critical / Dissatisfied / Easily Offended

- * I asked my friend F. to pick a place for me in our new classroom. When I walked in I saw the place she picked for me-it was in the corner next to the window. Even though this is what I had asked F. to pick for me I was upset about the location, it looked so crowded. I expressed my dissatisfaction with my seat to my classmates. Surprisingly they all wanted to switch seats with me. I didn't switch with them, but I was just not happy with the seat. (15)
- * I feel a desire to withdraw, disdain for people, short-tempered. Vitriolic, biting, scathing. A feeling like people weren't striving enough to become good people, they were succumbing to mediocrity. A stern, hardened feeling. (21)
- * Overly sensitive to jokes, take them personally. (1)
- * All my thoughts and communications were negative, I focused on the negative things, complained and complained. (15)

Release

- * I really felt my third eye "heaviness" tonight while meditating. I think I need to release some blockage before I will be able to really see. (14)
- * "Release" in right ear - like wind trying to escape - there is a physical opening of the ear passage, mouth and lip twitching as part of the release. (18)
- * Feel "energetic release" sort of like wind, exiting the back of my head on the right side. (18)
- * Feels like something like wind wants to be released from right ear. (18)
- * Release, spine, near heart area, softening, sinking in. (20)

* Woke 2 am, something happening in head, as if it were open, head releasing, unwinding open. (20)
